

Affiliation with SEAOC

SEA OCC is one of four (4) member organizations which comprise the statewide Structural Engineers Association of California (SEAOC). SEAOC is governed by a 12-member Board of Directors drawn from the four regional member organizations on a per capita basis. SEAONC and SEAOSC receive three delegates each, while SEA OCC and SEA OSD receive two. Delegates are appointed or elected to two year terms by the member organization to which they belong. This Board, with officers elected from among its 12 delegates, meets a minimum of four times a year, scheduling additional meetings if pressing issues arise. The member organizations submit a portion of their annual dues to SEAOC to fund operating expenses. Action taken by SEAOC requires a majority vote of the delegates present, and at least a 50 percent approval of the delegates present from each member organization.
